Detailed Action

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: with respect to claims 5-10, Monden teaches introducing nuclear waste into a container, then introducing a solidifying solution into the container filled with nuclear waste (Fig.2) after being kneaded in a solidifier kneading tank (10). Monden fails to teach that the waste introduction means is located downstream from the solidifying solution introduction means. In particular, as shown in Fig.2, the nuclear waste and solidifying agent are introduced into the container without any downstream or upstream movement of the container. As a result, it would not have been obvious to have modified the system disclosed by Monden to have located the waste introduction means downstream from the solidifying agent means without relying on hindsight.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
